

Create a dino goal with some sticks - you can secure them by pushing them in to soft ground. Ensure an adult supervisors or helps with this.

You can secure the sticks with string and or tape if you can't find the perfect "V" shape option.

It's part of the fun making the home-made dino goal.

Size wise this will only need to be 1 foot or about 30 cms high - flexible to the sticks you are able to find and your dino toy sizes.

Once you have your goal - you can position 2 or 3 dino goal keepers in it to try and score past in this challenge.
