

GET READY TO JOIN IN WITH THE WIZARD FUN!!!!

Thank you for registering for the Hocus Pocus Treasure Hunt LIVE event!
You have chosen to join the session for **Wed 19th August**.
In order to join the live broadcast please follow these instructions:

1. Click on this link and join the Facebook Group

Confirm the email address you used to register with when prompted.

2. Click HERE to download the clues to print out

Click HERE to download the clues to draw / trace if you don't have a printer

You can also find them in the files section of the group.

You need to download these in advance & print out the PDF clue points to use during the live broadcast. There are 2 options; one for if you have a printer and one for if you don't have a printer. These are some simple line drawings that you can copy and create your own clue points without a printer, just with pen and paper. So you can still easily create the treasure hunt points without a printer. Use the link above to download the PDF files, complete with instructions to hiding them beforehand.

Any technical issues, you can **contact us here**

3. Hide the clue points in advance of the session, within your home. They should be close by (same room or adjacent room) to where you will be tuning in and the child should be able to find them within a one minute counter, as they will be given the riddle and then one minute to find the corresponding clue point.

4. Tune in at your allotted time on the Facebook Group. The broadcast will be made LIVE from this group so if you are in the group at the allotted time you will see it pop up.

Click here to get a reminder and all links you need to join before the event starts. **PLEASE NOTE** you will need to have requested access to the group **prior to receiving this reminder.**

Important information

We will manage some shout outs for your children from Wizard Merlin during the event and these will be managed from the feed during the event. So if you type in your comments and interaction and he will endeavour to mention as many of your children as possible.

We cannot guarantee to pick up every comment or shout out but will try our best and during most LIVE events your children will get several shout outs if you type in the comments field as they are taking part. Please note if you are typing in the comments field then you must mention your child's name every time as the person operating the talkback to Wizard Merlin won't necessarily associate your name with your child's.

For example type "Jane is saying it's a broomstick"

Registration for the event will close 2 hours prior to the event start time.

At this point you will need to have requested access to the private Facebook group (see link above). **IMPORTANT** your registration is not complete until you have requested access to the group.

You should also check you can access the clue files in the group at this point.

Within 2 hours of the event start time, we cannot guarantee being able to solve any technical issues with access to the group or clue files after this point as our admin team will then be preparing for the technical operation of the event.

If you have an issue during this 2 hour run up please do **[contact us here](#)**.

If you have missed this deadline to get in the group, we will potentially be able to respond and permit you to the group up to 30 mins before the event, but we do not guarantee this due to this all being a manual process for internet security reasons. If you are late but it is still more than 30 mins to the start of the event **[message us here](#)** and we will endeavour to still approve you into the event.

If you do not request access or check clue files prior to the 2 hour deadline and have issues which cannot be resolved before the event time then we will reserve the right to transfer your registration to a future event or provide a full refund within 24 hours.

[Don't forget to click here to get a reminder for your event](#)

We wish you a brilliant time at our event!!!

Any technical issues or questions please **[contact us here](#)**
