

Dinosaur Fossil Find Fun - treasure hunt Live and Online - event, resource.

If you have a printer available at home just print out the 6 x A4 clue cards on paper - so your children have a visual to look for in the treasure hunt part of the event fun.

If you don't have a printer we provide a copy-able outline drawing version you can trace or copy.

We do a riddle clue to find each of the 6 dinosaurs:

Velociraptor

Triceratops

Parasaurolophus

Diplodocus

Tyrannosaurus Rex

Stegosaurus

You need to put these in view - pinned to the wall or on a shelf or similar - within 30-45 seconds looking time of where in your house you will watch the online video stream. You can hide extra treats with them if you wish.

Ranger Ron will ask if the children were able to find the clue points and note the letter shown. You can of course help little ones with the letters and what it spells during the game.

Rather than being a larger, human sized dinosaur,
the Velociraptor was around the size of a Turkey.

It is also believed to have had feathers.

Triceratops were 9 metres (30 feet) in length and weighed 5 tons. The bigger males would have weighed almost as much as a Tyrannosaurus.

Paleontologists think the Parasaurolophus walked on four legs (quadrupedal), but that it also had the ability to walk on two legs (bipedal).

Diplodocus measured up to 90 feet (27 meters) long.
This dinosaur was longer than a tennis court and is the
longest complete dinosaur that scientists have discovered.

Tyrannosaurus rex measured up to 13m (42ft) in length, 4m (13ft) at the hip and could weigh up to 7 tons!

The Stegosaurus had between 17 and 22 protective plates on its back.

The spikes on the tail of a Stegosaurus were up to three feet in length.
